

Bay Savers

Summary:

The Bay Savers Club is an environmental club that focuses on the school's sustainability with the ecosystem and strives to contribute to the preservation of natural species. In our mission to keep our school green and become a National Eco School, we have created a pollinator garden with plants native to Maryland, we have made bluebird boxes and we have raised a terrapin hatchling for the National Aquarium. We also perform other various tasks around the school in order to keep our school green including our participation in the Clean Green 15.

Key Topics:

- Students work with becoming a sustained Maryland Green School and a National Eco School (focusing on schoolyard habitat pathway and the pollinator garden and blue bird houses)
- Students work with the National Aquarium to raise a terrapin hatchling
- Students earn Service-Learning Hours

Expectations: weekly one hour meeting
